

Routledge ISDRS Series in Sustainable Development Research

Series Editors:

Walter Vermeulen, Associate Professor at the Copernicus Institute of Sustainable Development at the University of Utrecht, Netherlands and President of the ISDR Society

Pauline Deutz, Reader in the Department of Geography, Environment and Earth Sciences at the University of Hull, UK and Vice-President of the ISDR Society

The Routledge/ISDRS Series in Sustainable Development Research is the publishing platform of the wide community of 2500+ researchers engaged in multi-, inter- and transdisciplinary research on the need for and experiences with the transformation to a sustainable society.

The International Sustainable Development Research Society aims to disseminate knowledge on sustainable development practices in all spheres of society which enables the acceleration of sustainability initiatives: cities, communities, production, innovation, consumption, biodiversity and ecosystem services, agriculture, climate, renewable energy.

This series welcomes submissions for high-level cutting-edge research books that push thinking about sustainability in new directions by challenging current conceptualizations and developing new ones. The series offers theoretical, methodological, and empirical advances that can be used by professionals and as supplementary reading in courses in sustainability science, environment and sustainability, development studies, planning, and a wide range of academic disciplines.

To submit proposals, please contact the Editor, Rebecca Brennan (Rebecca.Brennan@tandf.co.uk, twitter: @BrennanRebecca1), or the Series Editors, Walter Vermeulen (president@isdrs.org) and Pauline Deutz (vicepresident@isdrs.org).

Routledge Handbook of Sustainability Indicators

Edited by:
Simon Bell, Stephen Morse

This handbook provides researchers and students with an overview of the field of sustainability indicators (SIs) as applied in the interdisciplinary field of sustainable development. The editors have sought to include views from the center ground of SI development but also divergent ideas which represent some of the diverse, challenging and even edgy observations which are prominent in the wider field of SI thinking.

June 2018; 246x174; 568pp
